

News Release

For immediate release: April 10, 2020

Contact: Troy Henderson, Director of Public Health, 509-397-6280 – Bill Tensfeld, Director of Emergency Management, 509-397-5605

Whitman County remains at 12 positive COVID-19 test results. 4 of the 12 cases have fully recovered and are cleared from isolation.

There has been a recent increase in fraudulent activities related to COVID-19. If citizens become aware of fake coronavirus testing sites, fake coronavirus testing kits, fake treatments or vaccines being advertised/sold, or coronavirus robocalls/in-person fraud, they can contact the Washington State Fusion Center at [intake@WSFC.wa.gov](mailto:intake@WSFC.wa.gov).

The CDC recommends wearing homemade masks in public where social distancing is impractical.

The Whitman County Health Department regularly updates their Facebook page with helpful information regarding personal protection and the status of county health operations.
