

News Release

For immediate release: July 24, 2020

Contact: Troy Henderson, Director of Public Health, 509-397-6280 – Bill Tensfeld, Director of Emergency Management, 509-397-5605

Whitman County has received three new positive COVID-19 test results. Two of the new cases are female, one between the ages of 40-59 and one between the ages of 20-39 years old. The other new case is a male between the ages of 40-59 years old. All are stable and self-isolating. A previous positive case is no longer being counted as a positive so the County total is now 76.

Current COVID-19 activity highlights the need for individuals to maintain social distancing and personal vigilance. Masks are an easy and effective way to reduce the spread of COVID-19.

The Whitman County Health Department regularly updates their website with helpful information including phased opening guidance, personal protection and the status of county health operations.

Future Whitman County press releases will be as needed.
